+1 781-267-9912

Technology executive with a multi-channel experience in organizational transformation and market innovation. Accomplishments restructuring global R&D functions while simultaneously opening new product categories and customer segments in Industrial Automation.

20+ Years in Automation Tech	5 Offer Families Led	6 USPTO Patents Granted	3 Career Tracks
--	--------------------------------	-----------------------------------	---------------------------

Equally fluent in corporate strategy and engineering rigor, a combination that enables credible leadership of both the business transformation agenda and the long duration technical programs characteristic of mature automation multi-nationals. Proven ability to restructure organizations, close performance gaps, and simultaneously pursue disruptive growth bets, all within complex matrix environments. Team creation, energization and precise operation toward business outcomes.

Executive Experience

Sr Director, Offer Management PA Field Devices Schneider Electric 2026-now	Re-established Offer Management as a formal discipline within PA Field Devices — building team, operating model, go-to-market readiness, pricing cadence, and structured VoC. Opened Datacenter Cooling as a net-new customer segment: unmet needs identified, existing portfolio adapted, short- and mid-term strategy defined. ↗ New organizational capability; new revenue segment under development
Sr Director, R&D Hardware CoE Process Automation Schneider Electric 2024-2026	Matrix accountability for Electronics & Mechanical design across DCS, SCADA, and Field Devices globally. Unlocked two long-stalled priority programs via LEAN flow intervention — both shipped. Resolved a persistent Sustainability KPI red flag through structural team and process changes. Stood up new team for SIS hardware refresh (IEC 61508/61511). Advanced carbon capture and IT/OT digitalization growth strategies. ↗ Two previously stalled projects released; Sustainability metric resolved; SIS parallel execution team established
Director of R&D PA Field Devices Schneider Electric 2020-2024	Owned R&D for five major field device offer families across development, V&V, and continuous engineering. Restructured global organization from geographic to technical discipline model; withdrew EU site, built India engineering lab. Served as company-wide supply chain crisis R&D lead. Selected for BU-level R&D restructuring task force. SE Edison Technical Leader; won executive mandate for Offer Creation & Innovation Lab. ↗ Global footprint restructured; supply chain crisis navigated; PA Future Architecture funded; new product category created; 6+ patents
Chief Architect / Head of Engineering PA Field Devices Schneider Electric (acquired) 2019-2020	Integration into Schneider Electric's global matrix. Established cyber-secure SDLC practices (IEC 62443). Represented technology in customer-facing C-suite sales engagements globally.
Chief Architect / Sr Eng Manager Adaptive Wireless Solutions 2005-2018	Co-developed company growth strategy with the President; led engineering execution of the industrial wireless instrument family that embodied it. Built engineering department from the ground up. Strategy and resulting product portfolio drove acquisition by Schneider Electric. Invented OTP encryption system for low-power wireless sensor networks (USPTO granted). ISA 100.11a standards delegate. ↗ Company acquired by Schneider Electric

Core Executive Competencies

Organizational Transformation Global R&D re-orgs; discipline-model restructuring; site creation, rationalization, including offices and complex lab builds; LEAN flow recovery of stalled programs; matrix management across NA, EU, APAC. Directly managed cross country cross culture teams : US, Canada, UK, France, Germany, India, China	Innovation & Market Growth New segment identification and entry (Datacenter Cooling, carbon capture, IT/OT). Blue Ocean / Business Model Innovation. Acquisition-driving product strategy. VoC-led offer evolution.
Offer & Product Management Full lifecycle from innovation through maintenance of line. Pricing strategy. Sales enablement and collateral. Consultative customer engagement in complex industrial B2B sales cycles.	Technology Depth & IP Embedded systems, wireless, instrumentation, MEMS, battery powered devices, functional safety, industrial cybersecurity, IT infrastructure & networks. 6 granted patents. 3 peer-reviewed publications. SE Edison Technical Leader.
Regulatory & Standards IEC 60079 IS/XP/ATEX, IEC 61508/61511 SIL/SIS, IEC 62443 Cybersecurity, EU CRA, FCC/IC/EU RED. ISA 100.11a delegate. Global certification body experience.	Executive Communication Corporate strategy and restructuring presentations. Technical executive reporting. Customer engagement globally, from executives to technicians. Skilled technical writer and educator.

Education & Executive Development

HEC 2024	Odyssey 3.14 — Business Model Innovation certificate course
INSEAD 2020, 2023	Blue Ocean Strategy / Business Model Innovation (TSL4) · Innovators Method (TSL3) certificate courses
WPI 1998-2005	B.S. Electrical & Computer Engineering with Distinction Graduate Studies in ECE (Signal Processing & Systems Modeling)

Selected Experiences

SE Edison Technical Leader · 6 USPTO Patents · Functional Safety IEC 61508/61511 · Explosion Protection / ATEX IEC 60079 · Cybersecurity IEC 62443 · ISA 100.11a co-author · 3 Journal Publications · Ultra Low Power Electronics & Embedded Software · MEMS Sensor Design · RF Design · Battery Systems · Linux & BSD · IT · US Citizen
